The sound of excellence
- Upright pianos -

*Welcome to C. Bechstein,
the German manufacturer
of top-quality upright and
grand pianos.*

C. Bechstein pianos are jewels hand-made in Germany, the last word in piano-making, built to satisfy the most discriminating ears and most demanding musicians.

At the C. Bechstein manufactory, experienced masters and specialists make unique instruments that have musical personalities all their own. These masterpieces are born under truly luxurious conditions: natural raw materials of prime quality are carefully selected, then stored under controlled climatic conditions, and finally processed by expert piano-makers. The genesis of a C. Bechstein piano is thus a process that takes many years.

The masterpieces produced in the German manufactory of C. Bechstein since 1853 are highly complex creatures, the result of a long process composed of hundreds of individual steps. They are musical jewels developed and produced with love. In the following pages, we would like to introduce some of C. Bechstein's experienced piano-makers.

👑 Residence

The uprights in the C. Bechstein Residence line meet the requirements of professional pianists with optimized sound, touch, case and acoustic assembly. These very sturdy instruments are ideal for intensive playing in conservatories and private music salons.

C. Bechstein Residence: excellent uprights that connoisseurs have long held in high regard.
